Anglian Water - We're Working In Your Area

My name is Megan Sperryn, and I'm the Customer Experience Specialist who will be supporting Anglian Water's upcoming water main renewal project in Whittlesey / Coates, I wanted to introduce myself as your main point of contact for the project.

From **4 January 2027**, we'll be starting work to install **over 10 kilometres of brand-new water pipes**, representing a **£1.5 million investment** in the local water network. This work will help reduce future leaks and bursts and improve the reliability of water supplies for customers across the area. The overall project is expected to continue through to the end of **2027**.
This project will involve the installation of new water mains along the length of **Wisbech Road (A605)**, from the junction with **March Road** through to the junction with the **A141** on the outskirts of Whittlesey.

The project has been split into three phases of work. The **first phase**, which is due to begin in **January 2027**, will take place on **Duncombe's Road** and will be carried out under a road closure. Phases 2 and 3 will largely be completed through private land adjacent to the highway. However, some sections of pipe will need to be installed within the road itself, and where this is necessary, we currently anticipate using **two-way temporary traffic lights.**
Phases 2 and 3 are still in the planning stage, and many of the details have not yet been finalised. However, I wanted to provide you with as much advance notice as possible, so you are aware of what's to come, and I will ensure that you are kept updated as plans are confirmed and more information becomes available.

As a local resident of Whittlesey myself, I appreciate how busy this route can be and understand the impact that traffic management on Wisbech Road may have on residents and road users. For that reason, I wanted to make contact at an early stage to give you the opportunity to share any local considerations that you feel we should take into account as we finalise our plans, and raise any concerns you may have. Also worth mentioning, I have personally pushed back the use of two way lights on this road so we don't impact anyone travelling from that direction for the Straw Bear festival!

Any residents directly affected by the works will receive detailed information explaining the project, timescales and access arrangements via an email or letter.
We will be making use of our social media platforms to keep the wider villages and surrounding areas informed as well.

I have included a link to our project webpage here which outlines the project in more details.

If you have any questions, concerns, or feedback from residents at any stage of the works, please don't hesitate to get in touch and I'll be happy to help wherever I can.

Thank you for your time. I look forward to working with you throughout the project and helping to keep residents informed as the scheme progresses.

Kind regards,

Megan Sperryn

Planned Improvement - Water Mains Laying/Replacement

Location : **Wisbech Road**

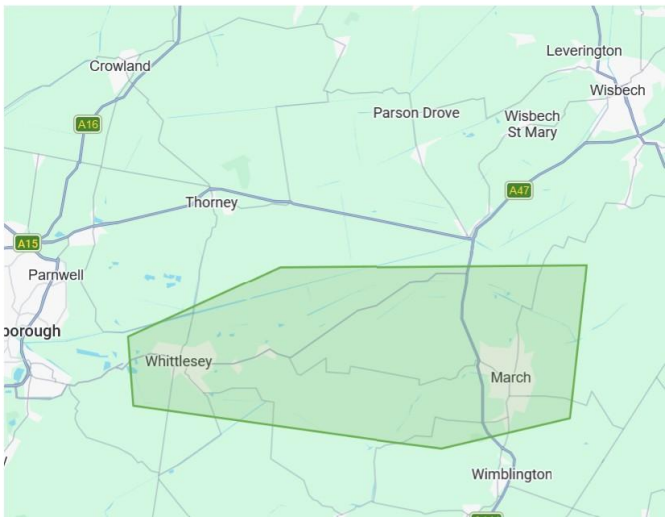
Affected Area : **Whittlesey**

Status : **Planned**

Job number : **30521414**

Estimated restoration : **26 February 2027 - 11:15**

Last updated : **26 November 2026 - 10:46**



We're upgrading water pipes in your area!

We'll be starting work in Coates on 4 January, investing £1.5 million to install over 10 kilometres of brand-new water pipes. These will help reduce leaks and bursts and make your water supply more reliable. We expect to finish at the end of 2027.

love every drop
