

SECURITY TIPS FOR DRIVERS

WITH KEYLESS ENTRY VEHICLES

GOT A MODERN, KEYLESS ENTRY VEHICLE? HERE'S SOME TIPS TO KEEP IT SAFE AND SECURE.

- Contact your dealer and talk about the digital features in your car. Have there been any software updates you can take advantage of?
- Check if your keyless entry fob can be turned off. If it can, and your dealer can also confirm this, then do so overnight.
- Store your keys away from household entry points such as your front and back doors or windows and consider using a signal blocker pouch to store your keys. Keeping your keyless entry fob out of sight is not enough – thieves only need to get near to the key to amplify the signal.
- If you park your vehicle on your driveway we advise investing in a driveway alarm, these are very easy to use and do not require any DIY skills to install.
- Be vigilant. Keep an eye out for suspicious activity in your neighbourhood – and report anything unusual to police online at www.cambs.police.uk/report or call 101 (or 999 in an emergency)
- Review your car security. Check for aftermarket security devices such as mechanical locks and trackers, which are proven to deter thieves.
