ENCOURAGING FEMALE PARTICIPATION IN STEM DISCIPLINES

Hannah, who has graduated from the scheme to BBC apprenticeship, shares her knowledge with the next generation of young techs.

YOUNG
TECHNICIANS
CIC

A Whittlesey Community Interest Company training young people in all aspects of the live events industry

Young Technicians CIC is a scheme that delivers lessons and practical experience for young people in lighting, sound, stage production and management. The man driving the scheme forward is Pino Soccio. Pino has worked in the industry both on stage, in touring bands, and off stage, in lighting and sound production, for over 20 years; and as a Music and Performing Arts technician in a secondary school for 7 years. Launching in Whittlesey and now operating in schools and centres across Peterborough, Sawtry, Whittlesey, Ramsey and Chatteris. Pino shares an ambition to roll the scheme out across Cambridgeshire. Recent successes include the graduation of the first Young Technician to an apprentice position with the BBC.

Our team of experienced industry professionals are dedicated to providing exciting and refreshingly pro-active training to our Young Technicians. We take the time to research, teach and deliver in completely new and innovative ways. We're here to help our Young Technicians succeed in becoming the industry's future and look forward to them creating the Fenland Youth Radio project!

FENLAND YOUTH RADIO

A YOUNG VOICE FOR WHITTLESEY

A community youth radio station run by the students, for the students and community will help build an inclusive atmosphere in Whittlesey. Radio is all about communication and running a radio show takes commitment and teamwork in order for it to be a success. Our systems are very easy to use and all students and members of community groups, regardless of age or ability, can get involved.

The Myriad system is used by more radio stations in the UK than any other software so our students and community groups have the exact same tools available to them as professional presenters and they are learning valuable skills they can use in a career not just specific to the radio industry but in most careers to enable them on their journey into work.

Fenland Youth Radio will offer a platform for young people to discuss the issues that matter to them in a non-confrontational format. Many find talking on the radio far less intimidating than performing live events or recording video. This helps presenters to express their views and ideas in ways they might otherwise never do. Fenland Youth Radio provides a fantastic platform for individuals

and community groups to voice opinions and involve the community in discussions, interviews, shows and radio drama.

Broadcasting opportunities are endless. Starting with broadcasting via the internet reaching anywhere across the globe to broadcasting via an aerial to the Fenland area.

BroadcastRadio

Myriad 5 Payout is a radio payout and automation system built from the ground up to provide a broadcast platform for the next generation of engaging and creative radio presenters and stations.

PROJECT OVERVIEW

TEACHING PRACTICAL SKILLS

The Young Technicians CIC scheme is not only all about lasers, speakers and lights. We offer opportunities to gain experience in the practical skills required to stage events, pre and post production, health and safety and of course everything required to run a radio station!

WORKING WITH WHITTLESEY TOWN COUNCIL

Our Young Technicians would love to work with Whittlesey Town Council to help spread the message of activities and make the younger generation more aware of what's happening in their town and the work of the council.

STEM LEARNING

We love introducing young people to the academic disciplines of STEM, offering an alternative interest for those who might not be interested in more mainstream activities such as sports. We offer real world skills and a career path into the live events industry.

HELPING THE HELPERS

We know that by supporting the third sector, we can help deliver social value. Fenland Youth Radio will work with local voluntary sector organisations to promote their activities with shows produced by our Young Technicians.
