Dear stakeholder

A47 Guyhirn roundabout junction improvements

Highways England operates, maintains and improves England's motorways and major A-roads. I'm writing to tell you about construction work which is about to begin in the area.

What we're doing

As part of our investment in the A47 road, we'll be making changes to the Guyhirn junction between the A47 (Fen Road to South Brink) and the A141 (March Road). We'll be increasing the size of the roundabout by creating two lanes on all approaches to it. The changes aim to reduce congestion, improve journey times and increase safety.

When will this work take place?

We will be on site to set up our construction site compound this week, starting from 11 February 2021. We will then begin to clear vegetation at Guyhirn roundabout adjacent to Old March Road on 15 February, ahead of starting our construction work in March.

What does this mean for you?

For the safety of motorists and our construction workers, we will need to close the road at key stages of the construction. We will provide more information about the dates and times of those road closures nearer the time. The details will also be shown on our project website at www.highwaysengland.co.uk/Guyhirn

Due to the nature of the work, some noise and light disturbance is unavoidable, however we will try to keep this to a minimum. We thank you for your patience during these roadworks.
