

# Unacceptable Behaviour By Some...

When Whittlesey Town Council decided to purchase the 'Old Police Station', several months of renovations took place to make the building 'Fit For Purpose' Councillors would have liked to have done more, but there were budgetary controls.

One enhancement was to install Electric Vehicle (EV) Charging Points, which are primarily fed via a Solar Array on the roof with associated electrics/control systems.

Immediately – The Trolls were accusing Councillors of 'Free Loading' at the rate payers expense ie charging their own EV Cars for 'Free'

Well at the time there were 3 Councillors who had Hybrid Cars (I being one) and only one used the EV point when he came on Council business.

Fast forward 2 years, I no longer own a Hybrid Car and the same Councillor as before only charges when on Council business.

Recently with the rise in Electricity charges, the 'Free to use' EV points have been extremely popular to the extent that some people are 'hooked up for 6+ hours & Overnight.

When our Town Clerk asked these people to be a bit considerate for others to use she had verbal abuse in return – not from one person but many who are being unreasonable. Any abuse is unacceptable whether it be the Town Clerk or we as Councillors.

**There are signs that state 3 hours maximum, and if 'people' can not be reasonable, there is a good chance the 'Free EV' points will be switched off.**

Abusive People Please Note....
