

# Kings Dyke Nature Reserve

Join us for our **48 HOUR BIOBLITZ!**

**Commencing Friday 21st July @ 6pm until Sunday 23rd July @ 6pm, 2023**  
**48 hours, recording as many species as possible!**

Everyone is welcome to come along and join in. Arrive/depart at any time during the 48-hour period.

Photograph any species you require help identifying.

The more the merrier!

We would also welcome any recorders who specialise in groups which we cannot cover ourselves.

Examples of these groups are:

- \* Bryophytes
- \* Fungi
- \* Galls
- \* Any other unusual groups!

The current total for the reserve to date is 3200 species records.

90 of these were new species for the reserve, recorded during last year's bioblitz.

Let's record some more!

Kind Regards,

**Lisa Gabriel**
