

Calling all Jenner Healthcare Patients.

The reformed Patient Participation Group (PPG) is looking for new members from the Jenner surgeries in Eye, Thorney and Whittlesey.

The aim of the PPG is to ensure the practice puts the patient and community health improvements at the heart of everything it does by helping the practice work well for patients, doctors, staff and the community.

Volunteers meet (in person and online) a few times a year to discuss the services on offer and how improvements can be made for the benefit of patients and the practice. The next meeting is due in February (date TBC).

It can help you as a patient to gain a better understanding of the NHS and primary care and feel more knowledgeable and confident about using the NHS: being able to access the right type of care, in the right place, at the right time, to manage your own health.

- It is open to all patients of the practice.
- It works independently on behalf of all patients.
- All members are volunteers.
- The meetings are held regularly - you can attend in person or via Teams.

A new steering group has already been established to take on the various roles, so there is no need to be concerned about being asked to commit to any new obligations.

Would you like to help the practice to help you and others?

Would you like to know more?

Would you like to make yourselves known to us?

If so, please register via this QR code below, or search Jenner Healthcare PPG, or by emailing: - cpicb.adminjenner@nhs.net
