

A flood warning has been issued by the Environment Agency.

Flood warning in force: North Bank Road alongside the River Nene, east of Peterborough and west of Dog-in-a-Doublet Sluice

Flooding is expected for: North Bank Road alongside the River Nene to the east of Peterborough and the West of the Dog-in-a-Doublet Sluice

Rising river levels are expected to cause flooding overnight.

Flooding is expected from overnight on 15 February 2026.

Further light rainfall is forecast for tonight and river levels remain high. During periods of high tide the River Nene will be unable to discharge into the sea, resulting in tide lock conditions. This is likely to lead to localised flooding of the North Bank Road, between Peterborough and Rings End. Whilst this Flood Warning is in force, the Local Authority will close North Bank Road. Diversionary routes will be put in place and further updates will be available through local media.

We are closely monitoring the situation.

Take care and avoid walking, cycling or driving through flood water.

This message will be updated by 5:00PM on 16 February 2026 or as the situation changes.
