The Resident(s)

25th February 2026

Our Ref: MDA\AMP\A110\2502\L01

Dear Resident

Charles Road Footway Link, Whittlesey – March 2026

I am writing to inform you that construction of a new footway to link an existing footway from Charles Road to Tayberry Way have been programmed to commence on-site from the 9th of March 2026. These works have an estimated duration of three weeks.

The Principal Contractor appointed to undertake these works is The Fen Group of Wisbech, PE14 0LH.

This scheme has been proposed to provide a safe and direct link between the existing residential areas and the recently developed housing estate, and is being delivered by the District Council, with funding provided by the Developer. The proposed works will involve the provision of a 1.8m wide surfaced footway through the grassed amenity area that is located between the existing and recently developed estate. This footway will follow the existing ground contours, and the design will minimise excavation and the need for removal of spoil from site.

Obviously, there will be some disruption caused by these works, but I would ask for your patience and understanding during the course of these construction operations. Site will be accessed via Tayberry Way and Mountbatten Way as and when required. It is hoped that this disruption can be kept to a minimum, and I apologise in advance for any issues caused as a result of these works.

If you have any concerns that you wish to discuss in advance of these proposed works, or during the construction period, please do not hesitate to contact me, details as above. Alternatively, if you have any issues outside normal working hours during the construction phase then please contact the Fenland District Council Out of Hours Emergency No. which is 01354 654321.

Thanking you in advance for your co-operation in these matters.

Yours faithfully/sincerely

Michael Austin
Engineer
